

ABOUT ME

I am a 3rd year student of Applied Computer Science and I am looking for my first professional experience in analysis and/or software development. I am particularly interested in using a data driven approach to identify patterns and improve performance. I also have Microsoft certificates in the field of programming, databases and Microsoft Azure data.

- Flexibility
- Patience

PROJECTS

▪ Weather Prophet

github.com/enviGit/WeatherProphet

C# | .NET Core | Newtonsoft.Json

The goal of the project is to provide users from around the world with a multilingual desktop application that allows them to check the current weather and forecast for the next few days for a specific city.

▪ Pomodoro Timer

github.com/enviGit/PomodoroTimer

C# | .NET Core | Newtonsoft.Json

Pomodoro Timer is a usefull tool that helps users apply the Pomodoro technique by providing a timer for the work and break sessions, as well as a list of completed sessions.

▪ Hotel Las Palmas

github.com/enviGit/HotelLasPalmas

C# | SQL | .NET Core | Entity Framework

Hotel Las Palmas is a versatile hotel room reservation system that includes features like managing client databases, adding, editing, and deleting existing client information, data validation, and cost calculation for renting specific rooms for specific days. The application also includes dialog windows for handling incorrect data and confirming key app functionality.
