PAWEŁ TROJAŃSKI
STUDENT

ABOUT ME

I am a 3rd year student of Applied Computer Science and I am looking for my first professional experience in analysis and/or software development. I am particularly interested in using a data driven approach to identify patterns and improve performance. I also have Microsoft certificates in the field of programming, databases and Microsoft Azure data.

  - jQuery
- HTML / CSS
- SQL
- Excel

SOFT SKILLS

- Teamwork
- Problem-solving
- Willingness to learn
- Attention to detail
- Time management
- Flexibility
- Patience

PROJECTS

Weather Prophet
github.com/enviGit/WeatherProphet
C# | .NET Core | Newtonsoft.Json | REST API
The goal of the project is to provide users from around the world with a multilingual desktop application that allows them to check the current weather and forecast for the next few days for a specific city.

Operation Deratization
github.com/enviGit/OperationDeratization
UnityEngine | C# | .NET Framework | Unity3D
Operation Deratization is a low poly, first-person shooter game with a battle royale theme. Play as a secret agent in a prison where only one can survive and gain freedom. No crosshair, limited ammo, and lootable equipment. Survive against AI opponents and a live audience for rewards.

Hotel Las Palmas
github.com/enviGit/HotelLasPalmas
C# | .NET Core | Entity Framework | SQL
Hotel Las Palmas is a versatile hotel room reservation system that includes features like managing client databases, adding, editing, and deleting existing client information, data validation, and cost calculation for renting specific rooms for specific days. The application also includes dialog windows for handling incorrect data and confirming key app functionality.
