EXPERIENCE

▪ Junior Technical Implementation Specialist

Printbox, May 2025 - Present

I manage the technical configuration, ensuring system reliability for our clients. My daily tasks involve troubleshooting technical issues, setting up product specifications, and providing direct support.

PROJECTS

▪ PS Catch

envigit.github.io/ps-catch

React | Tailwind CSS | Supabase | Python

PlayStation price tracker with real-time wishlist sync and advanced filtering. Built custom Python scraper for automated multi-region scans.

▪ Vibrant Icons

assetstore.unity.com/packages/tools/gui/vibrant-icons-276821

Unity | C#

Unity Editor extension for script icon customization. Streamlines asset management and project organization using custom visual identifiers.

▪ Operation Deratization

github.com/enviGit/OperationDeratization

Unity | C# | FSM

Unity FPS battle royale. Built proprietary enemy tracker and modular combat systems. Engineered advanced AI using Finite State Machines.
